

## Nonsmoking Policy

The Governing Board of UHS believes that education has a central role in establishing patterns of behavior related to good health, and it shall take measures to help its students to resist tobacco use. The Board also recognizes the importance of adult role modeling for students during their formative years. Therefore, smoking and the use of tobacco products ***shall be prohibited on and/or in all areas designated for use by UHS.***

Smoking and other tobacco use cessation assistance may be made available if requested. The School may provide a list of clinics and community resources which may assist employees who wish to stop using tobacco products.
